AI 321 Course Project

AI 321 Course project

- Submit a proposal for your course project, the project should demonstrate your knowledge of systems identification in a chosen field / application.
  - Control, economics, markets, engineering systems, machine learning, AI, etc.
  - Project demonstration will be done on the last day of class.
    - Dec. 5, 2026 Saturday (1 pm– 4pm): F2F (tentative)
  - Submit a documentation of your project after the demonstration.
  - Project counts as equivalent to two laboratory exercises
- I will open a submission bin to submit your concept paper / proposal for your project.
  - Include one or two references as the basis for your project concept.
